

Appendix A: Placement Test

The Placement Test provides for three outcomes:

- The student lacks the necessary skills to place in *CMC Level C*.
- The student places at Lesson 1 of *CMC Level C*.
- The student places at Lesson 16 of *CMC Level C*.

The test has two sections: 1 and 2.

Students who have not gone through *CMC Level B* should take Section 1. Results of this section will determine whether each student has the necessary skills to place at Lesson 1. Students who have gone through *CMC Level B* should take Section 2. Results of this section will determine whether a student places at Lesson 1 or Lesson 16 of *Level C*.

If possible, present the Placement Test on the first day of instruction. Pass out a test to each student. Present the wording in the test Administration Directions script.

Note: What you say is shown in blue type. When observing students, make sure that they are working on the correct part of the test. Do not prompt them in a way that would let them know the answer to an item.

Reproducible copies of the test appear on pages 139–141 of this guide.
