1. **Classroom Management**
   
   Demonstrations of how to integrate DI teaching techniques and non-scripted procedures to ease student interactions and maintain a positive classroom atmosphere.

   - State specific rules and expectations for academic and social behavior
   - Provide immediate, specific feedback:
     - Praise and challenge
     - Corrections

   The trainer explains that praise:
   - functions as both instruction to students about which behaviors are expected and also as corrective feedback to students who fall short of expectations
   - should be specific enough so as not to become background noise and so that students know specifically what to continue to do
   - should become increasingly focused on academic (rather than only social) behaviors.

   Trainer also demonstrates how to maintain student attention, correct restless behaviors to maximize instructional time, have students make quick and orderly transitions, and train students to work quietly and independently at their desks.
